

# A Study in Art Deco: Los Angeles

## Art Deco

The distinguishing features of the style are simple, clean shapes, often with a “streamlined” look; ornament that is geometric or stylized from representational forms; and unusually varied, often expensive materials, which frequently include man-made substances in addition to natural ones. Though Art Deco objects were rarely mass-produced, the characteristic features of the style reflected admiration for the modernity of the machine and for the inherent design qualities of machine-made objects (e.g., relative simplicity, planarity, symmetry, and unvaried repetition of elements).
